

HS-300C Technical Data Sheet

HONG'S BELT®

Pitch: 45mm	
Minimum Width: 195mm	- mm - i
Open Area: 52%	smm 45mm
Approved: FDA	4.5 ^{mm} 15 ^{mm}
Rod: Ø 5.8mm	
Flight: No	
Side Guard : No	
Curve: Yes	

Data

Design Guide Summary

- He minimum turning radius (inside) is 2.2 times of belt width under all feasible belt Width, 2.5 times of belt width is the most optimal.
- # The minimum straight run section near driving shaft and idling shaft of Radius belt must be 2 times of the belt width in length.
- H The minimum straight run section between two turns of opposing direction must be 2 times of the belt width in Length.

Guide Rail & Wear Strips

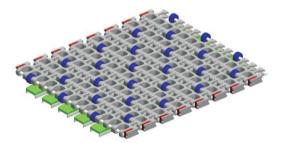

We have different kinds of guide rail and wear strips for your choice; For more information, please consult our sales team.

Support Mode of Insert Roller

Accumulation

Multi-Speed

Wear Strips are placed under the rollers and the speed of products on the belt will be 2 times of the belt speed.
